

How to use

1. Print at 100% scale. Do NOT use 'fit to page'.
2. Check the bar on the card with a ruler: it must be exactly 60 mm.
3. Tape the card flat on the wall, right next to the crack.
4. Photograph the crack and the WHOLE card in one shot.

The four black squares give the scale (px -> mm) and correct the viewing angle.

The grey swatches fix the colour; the red and blue ones only verify it.

This card does not diagnose safety. It only makes a photo measurable.
